

COMPUTER SCIENCE & ARTIFICIAL INTELLIGENCE EDITION

The Cap-Exempt Advantage.

58 verified-open US academic positions in **computer science and artificial intelligence** - and the H-1B filing data that shows which institutions actually sponsor.

Machine Learning · Artificial Intelligence · Systems · Theory · Security · Human-Computer Interaction · Data Science

WHAT THIS REPORT COVERS · COMPUTER SCIENCE & ARTIFICIAL INTELLIGENCE

Most candidates are searching the hardest possible way.

Every year thousands of international researchers apply into the H-1B lottery, lose, and conclude America is closed to them. Meanwhile the entire academic sector sits outside that lottery by statute - no cap, no registration window, no odds to beat. This report maps that opening for **computer science and artificial intelligence**.

58

positions verified open

09	What we verified, and what we could not	17

HOW THIS REPORT WAS BUILT

This edition publishes only what we could open and read. We fetched every posting in **computer science and artificial intelligence** on 26 August 2026, confirmed it was still live, and kept the 58 that passed, across **28 institutions in 15 states**. Then we cross-referenced every institution against US Department of Labor disclosure data - 2.4 million rows, deduplicated to 594,822 unique cases - to establish who actually files rather than who merely could. Every position sits in a [live, filterable list](#).

WHERE THE DEPTH IS

Institutions with the most open computer science and artificial intelligence positions in this edition:

Oak Ridge National Laboratory	11
Lawrence Livermore National Laboratory	7
Argonne National Laboratory	6
University of California, San Diego	4
Allen Institute for AI (Ai2)	4
University of California, Irvine	2
Carnegie Mellon University	2

All 58 positions, filterable

Tier, institution, department, deadline, salary, sponsorship note and a direct apply link for every row.

OPEN THE POSITION LIST

SECTION 01 · THE FUNDAMENTALS

Five facts that change the entire calculation.

01

Universities are cap-exempt

Under INA 214(g)(5)(A)-(B), higher-education institutions, their affiliated nonprofits, and nonprofit and government research organizations sit outside the H-1B annual cap entirely. No lottery. No March registration window. No numerical limit. A petition can be filed on any day of the year, up to six months before your start date.

Employer cost is roughly **\$960** - universities are exempt from both the \$1,500 ACWIA training fee and the \$600 asylum program fee.

02

The \$100,000 proclamation is not in force

Proclamation 10973 imposed a \$100,000 payment on certain H-1B petitions with no carve-out for universities. On **8 June 2026** the District of Massachusetts vacated the implementing policy nationwide, holding the payment to be a tax rather than a fee. The government appealed on 11 June and that appeal is pending.

This is volatile. Re-verify it against the docket before anyone files on your behalf. The proclamation self-sunsets around 21 September 2026 absent extension.

03

It never reached a change of status filed from inside the US

The payment only ever applied to beneficiaries *outside* the United States without a valid H-1B visa. If you are here on F-1 OPT or J-1 and the petition requests a change of status, you were never in its path.

Three traps survive: requesting consular notification instead of change of status, departing the US before adjudication, and having the change of status denied.

04

The wage-weighted lottery does not touch you

The new selection rule assigns 4x weight to Level IV wages and 1x to Level I - devastating for postdoc-scale salaries. DHS stated plainly in the rule text that cap-exempt university petitions are unaffected.

Watch instead the DOL prevailing-wage proposal (91 FR 15454). Still only proposed, but it *would* raise the wage floor on cap-exempt petitions.

05

J-1 became far less dangerous in December 2024

The Exchange Visitor Skills List was cut from 81 countries to 45, **retroactively**. India, China, Brazil, South Korea, Turkey and South Africa all came off, switching the 212(e) two-year home residency trigger off for their nationals.

Nigeria and the Philippines remain listed. Separately, from 15 September 2026 J-1 duration of status ends: admission caps at four years, with a USCIS extension required beyond.

No lottery. No March registration window. No numerical limit.

FACT 01 · UNIVERSITIES ARE CAP-EXEMPT

SECTION 02 · THE TWO FEES

Two fees, and only one of them ever reached you.

Twice in twelve months Washington has tried to put a six-figure price on hiring an H-1B worker. One threatened the exempt sector; the other widens its advantage. They are easy to confuse.

- 21 Sep 2025** ● **Proclamation 10973 takes effect**
\$100,000 payment required. No exemption for universities or nonprofit research.
- 23 Dec 2025** ● **D.D.C. upholds the proclamation**
Chamber of Commerce & AAU v. DHS. Appealed.
- 8 Jun 2026** ● **D. Mass. vacates it nationwide**
Held the payment is a *tax*, not a fee; INA 212(f) does not reach it. The government appealed on 11 June and that appeal is pending; DHS itself describes the vacatur as operative in its August proposal.
- 25 Aug 2026** ● **DHS proposes a \$103,265 cap-subject fee**
91 FR 54817, docket USCIS-2026-0298. A separate track, reaching cap-subject petitions wherever the worker is, and expressly **not** cap-exempt filings. Proposed only; it affects no petition today.
- ~21 Sep 2026** ○ **Built-in sunset of the proclamation**
The proclamation expires by its own terms twelve months after the effective date, absent extension.

WHAT THIS MEANS FOR YOU, PRACTICALLY

If you are **already in the United States** on F-1 OPT or a J-1 not subject to 212(e), and the petition requests a **change of status**, you were never exposed to the \$100,000 payment and are not exposed now. The \$103,265 proposal is narrower still: it is written to reach cap-subject petitions only, and institutions of higher education, their affiliated nonprofits and nonprofit research organisations are **expressly excluded**. Comments on it close 24 September 2026, and universities, research institutes and individual researchers can all file one. Verify both against the dockets before anyone files.

SECTION 03 · WHO ACTUALLY FILES

Capability is universal. Practice is not.

Every institution below is cap-exempt and could sponsor you tomorrow. These are the ones that demonstrably do in **computer science and artificial intelligence**. When a department says "we only do J-1", this is your evidence that it is one administrator's habit, not a policy. Red bars mark the elite institutions.

CERTIFIED COMPUTER SCIENCE AND ARTIFICIAL INTELLIGENCE RESEARCH PETITIONS, FY2025

Elite
Tier 2-3

Source: US Dept of Labor OFLC disclosure files, FY2025 Q1-Q4, deduplicated by case number, certified only, restricted to academic and research employers. Figures extracted by column name, since Q1 carries 97 columns and Q2-Q4 carry 98. An LCA is a wage attestation filed before the I-129, so it overstates approvals.

See which of these are hiring right now

The position list cross-references every institution above against its open postings.

OPEN THE POSITION LIST

SECTION 03 · WHO ACTUALLY FILES

The deepest computer science and artificial intelligence filers, ranked by total petitions.

INSTITUTION	ST	TIER	TOTAL FY25	POSTDOC TITLED	PROXY POSTDOC	ALL RESEARCH TITLES	MEDIAN POSTDOC WAGE
Carnegie Mellon University	PA	ELITE	46	12	0	20	\$68,914
Oak Ridge National Laboratory	TN	T2-3	29	6	1	19	\$92,412
Battelle Memorial Institute	WA	T2-3	21	0	1	19	–
Virginia Tech	VA	T2-3	38	7	4	17	\$68,053
Lawrence Livermore National Laboratory	CA	T2-3	15	2	1	15	\$136,768
University of Chicago	IL	ELITE	40	6	0	14	\$83,224
New York University / Langone	NY	ELITE	37	5	0	14	\$90,000
Princeton University	NJ	ELITE	25	9	2	14	\$78,000
UT MD Anderson Cancer Center	TX	T2-3	15	0	0	13	–
Argonne National Laboratory	IL	T2-3	13	4	0	13	\$70,758
University of Pittsburgh	PA	ELITE	32	1	2	11	\$62,232
UT Southwestern Medical Center	TX	ELITE	15	2	4	11	\$65,000
Cedars-Sinai Medical Center	CA	T2-3	14	0	1	11	–

Read the postdoc column, not the total

An institution can dominate on total volume and still show zero postdoc-titled petitions. That is not absence from the market - it is invisibility to anyone searching for the word. The **Proxy postdoc** column counts the same role filed under Research Fellow, Research Associate, Research Scholar, Staff Scientist or Scientist I/II. Page 12 explains what to search instead.

Two different animals

Some employers here are pure research shops with almost no faculty lines, and are effectively postdoc and staff-scientist pipelines. Others are faculty-weighted and hire almost no postdocs at all. Match the institution to the role you actually want, not to its brand.

SECTION 04 · WAGES & FLAGS

What the sector actually pays.

Offered wages on 190 certified computer science and artificial intelligence postdoctoral petitions, FY2025.

\$70,000

Median offered wage

\$62,920

Median prevailing wage - the DOL floor an employer must clear

DISTRIBUTION OF OFFERED WAGES

10TH PERCENTILE	25TH PERCENTILE	MEDIAN	75TH PERCENTILE	90TH PERCENTILE
\$59,634	\$65,000	\$70,000	\$78,000	\$91,625

The median **prevailing** wage, the DOL floor an employer must clear, was **\$62,920**. The heaviest computer science and artificial intelligence filer was **Carnegie Mellon University** with 20 postdoc petitions, and the best-paying was **Lawrence Berkeley National Laboratory** at \$103,428. Across all academic employers this field accounted for **4,129** certified petitions in FY2025.

SECTION 04 · WAGES & FLAGS

Stated in writing.

77%

Roughly 77% of computer science and artificial intelligence postings say nothing at all about visas. Silence is not an implicit yes, and on listings hosted behind unreadable portals it is not even evidence.

■ WILL NOT SPONSOR

Los Alamos National Laboratory 3 postings
NO SPONSOR NDAA bars PRC/Iran/DPRK/Russia citizens

Sandia National Laboratories 3 postings
NO SPONSOR DOE Q clearance requires US citizenship

UC Merced 3 postings
NO SPONSOR cannot sponsor new H-1B for applicants outside U.S.

Pacific Northwest National Laboratory 2 postings
NO SPONSOR must obtain/maintain US federal security clearance

Fermi National Accelerator Laboratory 2 postings
NO SPONSOR not eligible for sponsorship assistance

■ AFFIRMATIVELY WILL

NASA Jet Propulsion Laboratory 2 postings
SPONSORS J-1 eligible; designated-country nationals excluded

NASA Ames Research Center 2 postings
SPONSORS J-1 eligible; designated-country nationals excluded

NASA Goddard Space Flight Center 2 postings
SPONSORS J-1 eligible; designated-country nationals excluded NCAR / UCAR **SPONSORS** posting states Visa Sponsored Job: Yes Allen Institute for AI (AI2) **SPONSORS** visa sponsorship is available

Flags are drawn from the posting text. This edition was built by opening and reading every posting, so the sponsorship column in the accompanying position list is populated wherever a posting said anything: 23 of the 58 computer science and artificial intelligence rows carry a stated note. An empty cell means the posting was silent, never that the employer declined.

SECTION 05 · THE HIDDEN MARKET

Thousands of postdoc jobs are not called postdoc jobs.

This is the most expensive mistake in an academic job search, and almost nobody knows about it. A large share of US institutions never use the word "postdoc" on a requisition. They hire the identical role under a different title - and every search you run for "postdoc" returns nothing from them.

448

Postdoc-titled petitions

What these institutions filed under the word you are searching for

1,880

Postdoc-equivalent petitions

What they actually filed, under other titles, for the same work

Bars drawn to scale.

The live position list confirms it independently. Of the 706 open positions verified in this edition across all thirteen fields, 152 are doctoral research posts whose title never contains the word postdoc, spread across 58 institutions. In computer science and artificial intelligence alone the figure is 18 at 8 institutions.

SECTION 05 · THE HIDDEN MARKET

Postdoc-equivalent petitions, FY2025

- and what the role is actually called

INSTITUTION	PETITIONS	SCALE	TITLE IT IS FILED UNDER
Mayo Clinic	164		Research Fellow
Massachusetts General Hospital	157		Research Fellow
National Institutes of Health	148		Research Fellow
Dana-Farber Cancer Institute	109		Research Fellow
Harvard University	95		Research Associate
Washington University in St. Louis	91		Staff Scientist
University of Wisconsin-Madison	90		Scientist I/II
University of Pennsylvania	85		Research Associate
Brigham and Women's Hospital	76		Research Fellow
Boston Children's Hospital	74		Research Fellow
Memorial Sloan Kettering Cancer Center	52		Research Associate
University of Texas at Austin	39		Research Associate

Counts are across all fields. **Practical rule:** for these employers, search the title in the right-hand column. For everyone else, search both. One extra query for "Research Associate" and "Research Fellow" roughly doubles your visible market.

The position list already searches both

Every position in the list was found by querying research titles as well as postdoc titles.

[OPEN THE POSITION LIST](#)

SECTION 06 · THE CONVERSATION

How to raise sponsorship without damaging your candidacy.

The most common self-inflicted wound in an academic job search is asking the wrong person, at the wrong moment, in the wrong words. This applies to every **computer science and artificial intelligence** department in the list.

When	Never in the application or the first screen. Ask once genuine interest is established - ideally after an interview invitation, or at the offer stage.
Who	The Office of International Services, not the PI or the search chair. Most say "we do J-1" because it is all they have seen. The international office knows whether cap-exempt H-1B is available.
How	Frame it as logistics, not a demand. <i>"I want to make sure I can start on time. Could you connect me with the international scholars office to confirm the work authorization timeline?"</i>
Your leverage	The prevailing wage is the real objection, not the cost. If the posted salary already meets the OES prevailing wage for your job code and metro, say so. That removes the obstacle.
The argument they respond to	J-1 bars tenure-track candidacy under 22 CFR 62.20(d)(1). H-1B carries dual intent and supports retention onto a faculty line. That is a departmental interest, not just yours.
Fallbacks	O-1A needs three of eight criteria - peer review, scholarly articles and original contributions of major significance all count. EB-1B and EB-2 NIW skip PERM entirely. Note EB-2 India is unavailable for the rest of FY2026.

Not sure which route fits your profile?

A free evaluation tells you whether to pursue employer sponsorship, self-petition, or both in parallel.

evaluate.straightgreencard.com

START FREE EVALUATION

SECTION 07 · WITHOUT SPONSORSHIP

If nobody has to sponsor you, nobody can say no.

Everything so far assumes an institution files on your behalf. For a large share of the researchers reading this, that assumption is unnecessary. If your record in **computer science and artificial intelligence** already carries peer-reviewed publications, citations, invited talks, grant participation or journal review work, the strongest routes into the United States are the ones you control yourself.

O-1A

EXTRAORDINARY ABILITY, NONIMMIGRANT

Three of eight criteria - peer review of others' work, scholarly articles and original contributions of major significance all count. **No cap, no LCA, no prevailing wage, dual intent.** Three-year initial validity.

8 CFR 214.2(o)(3)(iii) · USCIS PM Vol. 2 Part M, updated 8 Jan 2025

EB-1A

EXTRAORDINARY ABILITY, IMMIGRANT

No employer, no job offer, no PERM. Three of ten criteria plus a final merits determination. For most non-India, non-China nationals the date is current today - an approval converts to a green card with essentially no queue.

INA 203(b)(1)(A) · 8 CFR 204.5(h)

EB-1B

OUTSTANDING RESEARCHER

Employer-sponsored but **skips PERM entirely**. Three years' experience, a permanent or tenure-track offer, two of six criteria. The natural companion to a cap-exempt faculty appointment.

8 CFR 204.5(i)

EB-2 NIW

NATIONAL INTEREST WAIVER

Self-petitioned, no employer, no PERM, governed by *Matter of Dhanasar*. **Harder since 15 January 2025:** USCIS tests threshold EB-2 eligibility *before* reaching Dhanasar, and the endeavour must be narrower than your occupation.

INA 203(b)(2)(B) · 6 USCIS-PM F.5

SECTION 07 · WITHOUT SPONSORSHIP

Where the queues actually stand.

CATEGORY	ALL OTHER	CHINA	INDIA
EB-1	Current	01 Jul 2023	15 Oct 2022
EB-2	Current	01 Sep 2021	Unavailable
EB-3	01 Sep 2024	01 Jan 2022	01 Jan 2014

Final Action Dates, Visa Bulletin, August 2026. EB-2 India is hard-unavailable for the rest of FY2026 and EB-1 India has retrogressed - which makes EB-1A the decisive filing for Indian nationals, not a nice-to-have.

Why run both tracks at once.

A cap-exempt H-1B is a door into academia, not a back door into industry. Under 8 CFR 214.2(h)(8)(iii) (F)(5), moving to a cap-subject employer puts you straight back into the lottery.

An approved O-1A or self-petitioned EB-1A removes that ceiling. The two tracks are not alternatives - the same publication record that wins you a postdoc is the evidence a petition is built from. Filed together, the position funds you while the petition frees you.

Your talent already belongs here. Let us prove it on paper.

O-1A, EB-1A, EB-1B and EB-2 NIW petitions built around your record, never a template. The first assessment costs nothing.

SECTION 09 · METHOD & LIMITS

What we verified, and what we could not.

How the position list was built

Every URL was fetched and confirmed to render a live **computer science and artificial intelligence** posting on 26 August 2026. Nothing appears in this edition unless its application page opened, its content was read, and its deadline had not passed. Coverage spanned HERC, AcademicJobsOnline, UC Recruit, Interfolio mirrors, Chronicle of Higher Education, Inside Higher Ed, Nature Careers, Science Careers, discipline society boards, USAJOBS and institutional applicant-tracking systems.

How the filing data was built

All four FY2025 DOL quarterly disclosure files - 2,422,227 rows - deduplicated by case number to 594,822 unique cases, 552,036 certified, of which 41,748 sit at academic and research employers. Every field extracted **by column name**, because Q1 carries 97 columns and Q2-Q4 carry 98.

Stated limitations.

- 01 This edition is a **floor, not a census**. A verification standard publishes nothing it cannot open, read and confirm as current, so the count is smaller than a comprehensive sweep would return. The distance is a measure of our standard, not of academic hiring.
- 02 **Portals that block automated reading are absent** despite being active hirers. Their absence means nothing. Check them in a browser.
- 03 **Interfolio detail pages could not be read**. Where a posting routes through it, salary and visa fields are *missing, not absent*. A blank sponsorship note there means unknown, never permission.
- 04 **Hiring cycles differ sharply by field**. Where this field is off-cycle in late August, the faculty count understates the year's real volume and a re-run in the autumn would return more tenure-track lines.
- 05 **USCIS approval counts are unavailable**. The USCIS Employer Data Hub returns HTTP 403 to automated access, and no FY2025 approval data has been published in any form. Nothing was estimated in their place.
- 06 **Some institutions petition through umbrella entities** - research foundations and system-wide bodies - and cannot be split by campus. A campus that shows nothing may simply be filing under another name.
- 07 **Postings close without notice**. Confirm every deadline on the posting itself before investing time.

WHERE WE COME IN

You have the data. Now build the case.

Finding the position is the first half. The second is the petition - and that is where most strong candidates lose ground they never needed to lose. Whether an institution sponsors you or you petition entirely on your own record, StraightGreenCard drafts and reviews the case for **computer science and artificial intelligence researchers**, clinicians and academics, with transparency at every step.

Case drafting

O-1A, EB-1A, EB-1B and EB-2 NIW petitions built around your actual record, not a template.

Case review

An independent read of a petition before it is filed, flagging what an officer will question.
